

# Mandala Art For Teachers

**Creative Patterns  
for Classroom Use**

## Suggestions for Use

This bundle contains multi-use blackline masters of original mandala artwork. These printables allow for endless possibilities in both the elementary and secondary classroom! The following are some ideas for use with these beautiful pictures:

- Create your own color-by-number or color-by-word worksheets specific to your content area.
- Identify geometric shapes and figures and find the measures of angles.
- Discuss the significance and history of mandalas. Have students create a mandala “quilt” with various patterns in the bundle.
- Teach the basics of the color wheel (primary, secondary, tertiary, complementary colors, etc.) and coloring/shading/patterning techniques.
- Simply allow students a chance to tap into their creativity as an enrichment or "early finisher" activity.

With some creative thinking and planning, the possibilities are numerous with these printables!

Terms of use for this product: These mandalas are the original copyrighted artwork of Charlotte James, Ph.D. (Funrithmetic). Permission is granted for reproduction of these pages for non-commercial personal or classroom use only. Reproduction of these materials for an entire grade level, school, or district is prohibited. To share with other teachers at your school, please purchase a multi-user license at my TpT store. Thank you.
